

The 3rd International Sports Analytics Conference and Exhibition (ISACE)

1-2 June 2026, Vancouver, Canada

 <https://formal-analysis.com/isace/2026/>

Sports analytics is the application of AI, data science, psychology, and smart devices to improve sports performance, strategy, and decision-making. It involves collecting, processing, and interpreting data from various sources such as video footage, performance metrics, and scouting reports, and using this information to gain insights into player and team performance, prevent injury, and help coaches and team managers to make more informed decisions and optimize their resources to achieve better results.

There are various sports analytics seminars, satellite workshops (associated with major AI and Data Science conferences), and regional conferences (e.g., MIT Sloan Sports Analytics). The vision of this new International Sports Analytics Conference and Exhibition (ISACE) series is to bring leading academics, researchers, coaches, psychologists, managers and technologists together to advance state-of-the-art of sports analytics.

The third ISACE (June 2026) will be in Vancouver, Canada (before The 2026 Soccer World Cup). The conference proceedings will be published in Springer LNCS series. Top papers will be awarded a Best Paper Certificate and a book voucher from Springer-Nature. Selected papers will be invited to submit an extended version to a special issue of the Springer-Nature Computer Science journal.

Important Dates (Anytime-on-Earth)

Paper submission: 1 February 2026
Notification: 1 March 2026
Camera-Ready: 15 March 2026
Conference: 1-2 June 2026

Conference Honorary Chairs

Prof. Jin Song Dong

National University of Singapore (NUS)
Founder of ISACE Conferences
